

# Cyber Security Assessments

Evaluate your cyber security maturity and get actionable intelligence about cyber threats and vulnerabilities across your organisation with a complete cyber security assessment.

# Manage current and emerging cyber threats with a comprehensive cyber security assessment designed to identify and close security gaps.

A comprehensive risk assessment identifies vulnerabilities, misconfiguration and poor practice and highlights the impact a cyber attack could have on your business.

Our assessments provide a clear understanding of your organisation's cyber posture by examining vulnerabilities, misconfigurations and poor practices, and highlighting the potential business impact of a cyber attack. This holistic approach ensures you gain visibility not only into technical risks, but also into the people and process-based gaps that influence your overall security maturity.

We use a range of industry-approved assessment frameworks to evaluate your environment across people, processes and technology, establishing a maturity baseline you can measure and improve over time. Each assessment also provides a platform for communicating the critical importance of cyber security at all levels of the business. Your comprehensive report features detailed and actionable insights for everyone—from the board and executive leaders to your technology teams—helping decision-makers prioritise budget, resources and the security response required.

## Key benefits of cyber security assessments.

-  Understand the vulnerabilities and weaknesses that cyber criminals can exploit across your entire organisation.
-  Establish a clear baseline of your cyber security maturity and understand the risks of not improving it.
-  Get actionable intelligence and reports so leaders and teams can make informed decisions about cyber security.
-  Check your compliance against industry frameworks to ensure your organisation meets applicable regulations.
-  Prioritise your cyber security response, allocating budget and resources where they are needed most.
-  Gain a holistic view across people, processes and technology, giving you the clarity needed to strengthen governance, uplift capability and support continuous improvement. [[orro.group](#)]

# How we help you.

## > Essential Eight Assessment

Our assessment determines your maturity against the ACSC Essential Eight mitigation strategies. Implementing the Essential Eight is a critical foundation for developing a robust cyber security strategy and reducing the likelihood and impact of common attacks.

## > CIS 18

The Center for Internet Security (CIS) Top 18 Critical Security Controls is a prioritised set of best practices designed to mitigate the most dangerous cyber threats. We use this holistic assessment to determine your cyber security maturity by identifying vulnerabilities across people, processes and technology.

## > ISO 27001 compliance

ISO 27001 provides an international standard for establishing, maintaining and continually improving an information security management system (ISMS). Our assessment identifies gaps and outlines improvements to help protect information assets. (Organisations that meet the standard may be audited and certified by an accredited certification body.)

## > Audit compliance

Demonstrate control effectiveness and address variances against applicable frameworks. Our reporting supports stakeholder communication and helps streamline audit preparation and follow-up remediation.

## > Penetration Testing

We provide internal and external penetration testing and attack simulations to identify weaknesses that could be used to gain access to and control of your business networks, critical assets and services. Our comprehensive reporting sets findings in the context of your operations and provides prioritised recommendations to address identified risks.

## > Compliance & Control Assessment

A comprehensive audit of your environment aligned to recognised frameworks to help meet insurance and regulatory requirements. We identify vulnerabilities or threats and report any variances requiring remediation so you can prioritise risk reduction with confidence.

## > Threat & Risk Assessment

Identify and evaluate cyber security risks in the context of your business and industry. We provide actionable recommendations to mitigate risk and close security gaps, aligned to your strategic objectives and risk appetite.

# The future feels like this.®

We are a multi-disciplinary technology powerhouse, committed to keeping our customers secure and connected. We partner with our customers to boldly embrace the challenges of tomorrow, ignite innovation, and facilitate growth.

- > **Trusted Partner**  
Our customers don't just trust us to keep them productive and secure today, but to prepare them for what's next, to grow with them over time and to collaboratively shape their future.
- > **Strategic Advisor**  
With deep expertise in multiple facets of technology, our customers rely on us to provide them with strategic advice and guidance, helping them make smart moves towards a secure future.
- > **Solution Provider**  
Our versatile suite of skills enables us to tackle complex challenges for our customers, providing them with complete business solutions that draw from our vast pool of expertise and resources.

## Stay connected and protected with Orro®.
