

# Dark Web Monitoring

Stop external threats before they reach your business.

Securely Connected Everything™

In today's connected world, every business is aware of potential cyber-criminals, but not every company is equipped to detect and respond to the risks emerging beyond their own network perimeter.

The dark web is a labyrinth of threats hidden from the typical internet user, only accessible through specialised software. Because individuals can remain completely anonymous, the dark web has become a hub for illicit activity - including the sale of stolen data, leaked credentials, and tools used to target organisations. This anonymity increases both the danger and the frequency of cyber-criminal operations.

Businesses require the ability to quickly and proactively identify these external threats. Manually searching for stolen information is inefficient, time-consuming, and can expose an organisation to additional risk.

At Orro, we provide a safe and structured dark web monitoring service that is risk-based, efficient, and effective for your organisation. Our monitoring platform delivers context-specific, actionable intelligence drawn from a broad range of carefully curated sources, helping you identify threats early and respond appropriately.

## Key benefits of dark web intelligence.

-  **Track potential threats** through comprehensive monitoring across clear, deep, and dark web sources, using industry-leading intelligence collection capabilities.
-  **Identify exposed credentials** in near real-time so your organisation can act quickly to prevent unauthorised access and reduce the risk of a breach.
-  **Detect data leaks** and brand misuse early - including stolen information, impersonation attempts, or discussions relating to your organisation within underground channels.
-  **Support fast removal of malicious content**, such as phishing websites or impersonating social media profiles, through coordinated takedown actions.

# How we help you.

## > Active reconnaissance

Using our dark web monitoring platform, Orro continuously collects, analyses and validates intelligence from a broad range of underground sources. This allows us to identify threat actor activity, stolen data, impersonation attempts and other external risks relevant to your organisation – providing timely, contextual intelligence you can act on.

## > Detect exposed credentials

Our intelligent monitoring platform performs continuous scanning across clear, deep and dark web sources to identify if your organisation's credentials have been leaked or compromised. This enables your business to take immediate action to prevent unauthorised access, reduce risk, and minimise potential breach impact.

## > Map your attack surface

Our platform builds a dynamic view of your organisation's externally-facing digital footprint - including brands, domains, executive identifiers and other at-risk assets – helping reveal where attackers may attempt to exploit or impersonate your organisation. This gives you clearer visibility of exposure points across public and underground sources, without requiring access to internal systems.

# Orro National Cyber Defence Centre

With Security Operations Centre (SOC) Analysts working alongside Pen Testers, Incident Responders, Security Consultants and Architects, we provide a more holistic approach to securing your business.

**80+ cyber security experts**

**20+ years' experience**

**Australia & UK SOC facilities**

**24/7 monitoring and response**

**Follow the sun capabilities**

# The future feels like this.®

We are a multi-disciplinary technology powerhouse, committed to keeping our customers secure and connected. We partner with our customers to boldly embrace the challenges of tomorrow, ignite innovation, and facilitate growth.

- > **Trusted Partner**  
Our customers don't just trust us to keep them productive and secure today, but to prepare them for what's next, to grow with them over time and to collaboratively shape their future.
- > **Strategic Advisor**  
With deep expertise in multiple facets of technology, our customers rely on us to provide them with strategic advice and guidance, helping them make smart moves towards a secure future.
- > **Solution Provider**  
Our versatile suite of skills enables us to tackle complex challenges for our customers, providing them with complete business solutions that draw from our vast pool of expertise and resources.

## Stay connected and protected with Orro®.

Discover how we can help your business and your people with Securely Connected Everything™.
