

# Endpoint Detection & Response (EDR)

Proactive defence for modern, mobile businesses

Securely Connected Everything™

# Resilience isn't accidental - it's earned through intelligent, autonomous endpoint protection that removes complexity and outpaces every modern threat.

As attackers leverage stealthier, more evasive techniques and workforces continue to operate beyond traditional network boundaries, legacy security tools can no longer keep pace. Modern threats — from behavioural-based intrusions to rapid lateral movement — demand real-time visibility, continuous monitoring and automated response to contain incidents before they escalate.

Orro's Endpoint Detection & Response (EDR) Service delivers exactly that. Built on intelligent detection and automated containment capabilities, our service provides deep visibility across endpoints and enables rapid, coordinated response to emerging threats.

Our highly trained security engineers deploy and tune EDR policies using a proven, risk-balanced methodology that strengthens your security posture from day one. With enhanced threat detection, streamlined investigation workflows and responsive automation, Orro ensures your device fleet remains protected, visible and resilient — no matter how your environment evolves.

## Key benefits of Endpoint Detection & Response.

-  **Detect sophisticated threats in real time**  
Identify malicious behaviour early with continuous monitoring and behavioural analytics.
-  **Contain incidents instantly**  
Automated isolation stops threats spreading across your environment and safeguards business continuity.
-  **Accelerate investigation and response**  
Reduce recovery time with rapid triage, root-cause analysis and guided remediation.
-  **Lift your security maturity**  
Close visibility gaps across all endpoints and strengthen your defensive baseline.
-  **Simplify endpoint operations**  
Centralised management reduces operational overhead and frees resources for core initiatives.
-  **Reduce risk across a mobile workforce**  
Maintain consistent protection across remote, BYOD and hybrid environments.

# How we help you.

## > Expert implementation

Delivered by Orro's skilled and certified engineers, your EDR deployment is built using proven methodologies that minimise operational disruption and ensure your controls align with modern endpoint security needs.

## > Intelligence-Driven

All alerts flow into the Orro SIEM and are monitored by our security analysts, providing ongoing threat visibility with clear escalation paths and rapid response.

## > Strategic Approach

We plan and implement EDR in structured phases, avoiding "big-bang" changes and ensuring operational continuity while improving your security posture.

## > Automation

Automated response actions – including endpoint isolation and malicious process termination – reduce the time between detection and containment, protecting your business before an incident escalates.

## > Proven Methodology

Our battle-tested policy creation and tuning approach balances risk with service performance, ensuring false positives decrease while threat coverage increases.

## > Local & proactive

With in-house analysts, incident responders and threat hunters, our team actively searches for signs of compromise and responds swiftly to suspicious activity.

# Orro National Cyber Defence Centre

With Security Operations Centre (SOC) Analysts working alongside Pen Testers, Incident Responders, Security Consultants and Architects, we provide a more holistic approach to securing your business.

**80+ cyber security experts**

**20+ years' experience**

**Australia & UK SOC facilities**

**24/7 monitoring and response**

**Follow the sun capabilities**

# The future feels like this.®

We are a multi-disciplinary technology powerhouse, committed to keeping our customers secure and connected. We partner with our customers to boldly embrace the challenges of tomorrow, ignite innovation, and facilitate growth.

- > **Trusted Partner**  
Our customers don't just trust us to keep them productive and secure today, but to prepare them for what's next, to grow with them over time and to collaboratively shape their future.
- > **Strategic Advisor**  
With deep expertise in multiple facets of technology, our customers rely on us to provide them with strategic advice and guidance, helping them make smart moves towards a secure future.
- > **Solution Provider**  
Our versatile suite of skills enables us to tackle complex challenges for our customers, providing them with complete business solutions that draw from our vast pool of expertise and resources.

## Stay connected and protected with Orro®.

Experience the impact of Securely Connected Everything™.

Connect with our team and take the next step.
