ORRO®

Cyber Security

Endpoint Security

Keep your data and devices safe with leading detection and response capabilities.

Securely Connected Everything™

Orro focuses on removing the challenges of mobility and complexity for your business' endpoint security.

From deployment to policy configuration and automation, our team has the expertise to manage your business devices securely.

Historically, endpoint management has relied on the protection of enterprise security controls. However, with a significant shift towards a diversified workforce, endpoint mobility can no longer rely on traditional techniques, with detection capabilities now trivial to bypass.

Orro endpoint security is built on Carbon Black Next-Gen endpoint detection and response technology enhanced by Splunk SOAR automation. Our highly trained and certified security engineers deploy tailored policy sets and implement an endpoint management methodology to meet the mitigating controls required for modern and secure business activities.

Key benefits of endpoint security.

- ✓ Protect against key threats to maintain business as usual.

- ✓ Simplify endpoint management to redirect resources to core business initiatives.

- ✓ Unify management with security for a stronger security baseline.

- ✓ Identify and close security gaps to bolster protection of critical assets.

orro®

How we help you.

Expert implementation
Assisted implementation from Orro's highly skilled and certified engineers.

Strategic approach
Implementation plans that minimise the risk of a "big bang" approach on operational continuity.

Proven methodology
A battle-tested approach to policy creation – balancing risk with service delivery.

Intelligence-driven
Ongoing monitoring of alerts via the Orro SIEM solution with escalation paths.

Automation
Ability to automate response and isolate impacted devices before a significant incident occurs.

Local & proactive
In-house ability to hunt threats and respond to a cyber incident.

Orro National Cyber Defence Centre

With Security Operations Centre (SOC) Analysts working alongside Pen Testers, Incident Responders, Security Consultants and Architects, we provide a more holistic approach to securing your business.

80+ cyber security experts

20+ years' experience
