Network

Secure Client to Cloud (SASE)

Delivering fast and secure network, internet and cloud access.

Securely Connected Everything™

Supercharge your network security for faster and more flexible access with Secure Client to Cloud.

Our advanced Secure Client to Cloud solution that combines SD-WAN and Security as a Service in a unified cloud-native platform that simplifies network and security infrastructure, increases productivity and reduces costs. It's our evolution of a Secure Access Service Edge (SASE) platform, which delivers a consistent, fast and secure connection for your team, no matter where they are or what device they are using.

The threat of a cyber attack continues to rise as organisations embrace hybrid and remote work. Driven in part by the vulnerabilities created by an increase in working from home, now is the time to increase security defences at the edge of the network.

Orro's Secure Client to Cloud solution helps organisations support hybrid and remote work with secure, agile and efficient network and security infrastructure.

Key benefits of Secure Client to Cloud.

- ✓ **Simplify network and security management** and deployment with a single, cloud-based platform.

- ✓ **Reinforce security** with integrated functions to help protect your data, applications and devices from various threats.

- ✓ **Improve performance** by leveraging cloud-based services and intelligent traffic routing to optimise application performance and reduce latency for users.

- ✓ **Enjoy cost savings** with consolidated network and security services that reduce hardware, software and maintenance costs.

- ✓ **Enhance visibility and control** over data, applications and user activities to help meet regulatory and compliance requirements.

How we help you.

› Secure Client to Cloud (SASE)

Our SASE solution combines a comprehensive set of security functions including Firewall as a Service (FWaaS), Secure Web Gateway (SWG), Zero Trust Network Access (ZTNA), and Cloud Access Security Broker (CASB) to help protect your data, applications and devices from various threats. With centralised network and security management through a single, cloud-based platform, we reduce the complexity of managing multiple point solutions.

› Zero Trust Network Access (ZTNA)

Our Secure Client to Cloud solution helps facilitate zero trust network access, which is an identity-driven approach to security; also known as the software-defined perimeter. By default, it denies access to a network, applications and data, even from within the office, significantly improving security posture and risk management.

› Dedicated Internet Access (DIA)

SASE grants visibility and control of cloud-based apps and data, while migrating the security stack to the cloud. This allows businesses to operate secure multi-cloud networking with secure Dedicated Internet Access (DIA) broadband links for remote branches and roaming users.

› SD-WAN

We're the Australian leader in SD-WAN network deployment, delivering advanced networks with greater efficiency, performance, flexibility and resilience. A secure client to cloud network connection using SASE seamlessly integrates the networking strengths of SD-WAN with the protection of holistic cloud-based security which extends to the edge.

› Security as a Service

Security as a Service (SECaaS) is a cloud-based model that provides businesses with comprehensive security solutions, including threat detection, incident response, and data protection, without the need for on-premises hardware or extensive in-house security expertise.

› Support a hybrid workforce

Empower remote and mobile workforces with a SASE solution that can support a hybrid workforce using multiple devices from different locations. Whether teams rely on collaboration tools, Software as a Service (SaaS) applications, traditional apps or rich video content, SASE provides access in a secure and controlled environment.

The future feels like this.®

We are a multi-disciplinary technology powerhouse, committed to keeping our customers secure and connected. We partner with our customers to boldly embrace the challenges of tomorrow, ignite innovation, and facilitate growth.

> ### Trusted Partner
> Our customers don't just trust us to keep them productive and secure today, but to prepare them for what's next, to grow with them over time and to collaboratively shape their future.

> ### Strategic Advisor
> With deep expertise in multiple facets of technology, our customers rely on us to provide them with strategic advice and guidance, helping them make smart moves towards a secure future.

> ### Solution Provider
> Our versatile suite of skills enables us to tackle complex challenges for our customers, providing them with complete business solutions that draw from our vast pool of expertise and resources.

Stay connected and protected with Orro®.

Discover how we can help your business and your people with Securely Connected Everything™.
