Digital Asset Discovery

Securing Your Operational Technology

orro.group

Introducing
Digital Asset Discovery

In an age where the convergence of IT and OT is rapidly transforming industries, the security of operational technology (OT) has never been more critical. Orro's Digital Asset Discovery service offers a swift, efficient solution to uncover, catalogue, and assess all your OT and critical assets.

This service empowers your organisation to gain immediate insights into your security posture, prioritise remediation efforts, and lay a robust foundation for future cybersecurity initiatives, such as continuous monitoring through an OT Security Operations Centre (SOC).

Why Digital Asset Discovery Matters

Many organisations operating critical infrastructure struggle with maintaining a clear, up-to-date inventory of their OT and critical assets. This lack of visibility leaves them vulnerable to unpatched systems and undiscovered threats. With the increasing integration of traditionally air-gapped OT systems into broader IT networks, the risk of cyber threats escalates, making comprehensive asset discovery a necessity for safeguarding your operations.

Orro's Digital Asset Discovery service is designed for rapid deployment and minimal disruption, providing you with a clear and actionable view of your OT and critical assets. Our approach is structured around three key phases:

Rapid Deployment

We deliver a ruggedised discovery platform to your site through a secure supply chain. This platform is quickly deployed for a defined assessment period, ensuring minimal downtime and rapid initiation of the discovery process.

Comprehensive Identification

The platform meticulously identifies devices, software, and protocols within your OT/ critical network, including critical Industrial Control Systems (ICS) and IoT devices. We uncover both known and previously unknown assets, providing a complete inventory.

Detailed Reporting

We generate a comprehensive list of all discovered assets, highlighting vulnerabilities, patch status, and network segment exposure. Health scores and risk prioritisation are included to guide your remediation efforts and strategic planning.

This approach ensures that you gain immediate insights into your security posture, enabling you to prioritise remediation and lay a robust foundation for future cybersecurity initiatives.

Key Benefits

Enhanced Security Posture:

> Gain immediate insights to prioritise remediation and strengthen your overall cybersecurity defences.

> Rapidly identify and mitigate potential threats in your operational technology (OT) environment.

Informed Decision-Making:

> Detailed findings on asset types, firmware/software versions, and high-risk exposures enable strategic security planning.

> Achieve a complete inventory of all OT and critical assets, including those previously unknown.

> Effectively prioritise remediation efforts based on asset health scores and risk assessment.

Compliance and Future Readiness:

> Facilitate compliance with regulations like the Australian Security of Critical Infrastructure (SOCI) Act.

> Streamline compliance reporting and demonstrate adherence to regulations.

> Prepare for future security demands with a clear remediation roadmap.

> Roadmap for longer-term security initiatives, potentially feeding into an OT SOC or managed security programs.

Why Orro?

Orro is a leader in OT and critical asset cybersecurity, providing specialised expertise and technology to safeguard your critical assets.

Beyond our Digital Asset Discovery service, we offer comprehensive solutions like Vulnerability Management, Incident Response Planning, and OT SOC services, ensuring complete protection. Leveraging industry-leading tools and deep OT knowledge, we deliver accurate discovery and actionable insights, with optional integration into your existing security platforms.

orro®

The future feels like this.®

We are a multi-disciplinary technology powerhouse, committed to keeping our customers secure and connected. We partner with our customers to boldly embrace the challenges of tomorrow, ignite innovation, and facilitate growth.

> ## Trusted Partner
> Our customers don't just trust us to keep them productive and secure today, but to prepare them for what's next, to grow with them over time and to collaboratively shape their future.

> ## Strategic Advisor
> With deep expertise in multiple facets of technology, our customers rely on us to provide them with strategic advice and guidance, helping them make smart moves towards a secure future.

> ## Solution Provider
> Our versatile suite of skills enables us to tackle complex challenges for our customers, providing them with complete business solutions that draw from our vast pool of expertise and resources.

Take the First Step Towards Securing Your OT Assets

Don't wait for a security incident to understand your vulnerabilities.

Contact Orro today to learn how our Digital Asset Discovery service can provide the critical insights you need to protect your organisation's future.
