Cloud Network Access Control

Network access control, built for the cloud era.

Securely Connected Everything™

Introducing Orro Network Access Control

On-premises network access control systems cannot cope with the influx of mobile devices, BYOD policies, distributed workforces, and evolving security threats.

Recognising the challenges of securing network authentication across users, mobile and a distributed workforce, we developed our Cloud NAC service – the smarter, more efficient way to maintain secure access to your network.

Cloud NAC combines our cutting-edge One Touch Control AIOps platform, Juniper Networks' best-in-class technology, and round-the-clock support from elite experts to deliver the most advanced access control solution available.

Expect Outstanding Outcomes With Orro SASE

Zero-trust security
Strong authentication for all access attempts.

AI-driven automation
Fast, one-click device provisioning.

User experience visibility
Cohesive view of user connectivity experiences.

Effortless scalability
Add new users and devices easily.

High availability
Reliable and low-latency access control.

Minimal physical IT footprint
No need for on-prem server hardware.

24x7 expert support
Always available when you need us.

Cost savings
Reduce costs with flexible subscription-based pricing.

orro®

Key Capabilities

> Migration

Smoothly transition from on-premise NAC solutions to cloud-based NAC with our migration services. We handle everything from assessing your current setup to executing the migration and providing post-migration support. Our goal is to minimise downtime and disruption, so your business continues running smoothly throughout the changeover.

> Custom Integration & Development

Enhance your cloud NAC experience with our custom integration and development services. We'll connect your NAC solution with other security and IT management tools, making it easier to manage your network. We also develop custom integrations and enhancements to improve the platform's functionality and user experience.

> Managed Security Services

Strengthen your defences with our managed security services, now including cloud NAC. This integration provides a comprehensive security solution that covers network access control, continuous monitoring, threat detection and response, and proactive enhancements

> Policy Development & Enforcement

Create and enforce network access policies that align with your business goals and security needs. Our team works closely with you to develop customised policies and implement them using the cloud NAC solution. This ensures consistent and effective access control across your entire network.

> Incident Response & Threat Mitigation

Be proactive with our incident response and threat mitigation services. Using the cloud NAC platform in conjuction with our traditional security tools, we swiftly detect and respond to security incidents. Our services include threat analysis, containment, eradication, and recovery, ensuring your network stays secure and resilient against threats.

> Security Compliance & Reporting

Achieve and maintain industry compliance effortlessly with our security compliance and reporting services. We help you meet standards through detailed assessments and regular reports. Plus, our audit trails ensure you have the documentation needed for any compliance audits.

The smarter, more efficient way to maintain secure access to your network.

Performance Optimisation

Keep your NAC environment performing at its best with our optimisation services. We regularly review and fine-tune your NAC solution's configuration and policies to ensure optimal security and efficiency. If performance bottlenecks arise, these are addressed through the the microservicves cloud architecture to keep your network running smoothly.

Continuous Monitoring & Management

Remain resilient with our continuous monitoring and management services. We use advanced real-time monitoring tools to oversee your NAC solutions, detecting and responding to potential issues instantly. Our goal is to ensure your NAC environment remains secure and performs optimally at all times.

Training & Support

Maximise your NAC investment with our comprehensive training and support services. We provide training sessions for your IT staff and end-users, ensuring everyone understands and can effectively use the cloud NAC system. Our ongoing support is always available to address any issues and offer best practice guidance.

Multisite & Remote Access Management

Implement and maintain consistent access controls across multiple sites and remote users. Customised configuration and wireless parameters makes it easier for users with the right credentials to securely access your network, databases, and applications, wherever they are.

Business Continuity & Disaster Recovery

Ensure uninterrupted operations with NAC strategies that support business continuity and disaster recovery. We develop and implement plans to keep your NAC policies effective during disruptions. Our services also ensure your network access controls can be quickly restored after any incidents.

orro®

Powered by

ORRO OneTouch®
CONTROL

Orro's One Touch Control platform easily integrates in parallel with your NAC solutions, giving you a comprehensive, real-time overview of your network. This improved visibility, paired with robust NAC management features, ensures that only authorised users and devices can access your applications and resources.

Perceive holistically

Get a full, real-time view of your network environment in one intuitive dashboard.

> **Unified alerts:**
> Merge alerts for real-time tracking.

> **Interactive maps:**
> Pinpoint issues with live, colour-coded maps.

> **Dynamic wallboards and diagrams:**
> Visualise network health and capacity.

> **Site health snapshots:**
> Real-time performance summaries.

> **Asset oversight:**
> Track assets with a configuration management database.

Predict accurately

Predict future issues by learning from the past and take corrective action

> **Predictive alerting:**
> Spot potential failures early using system logs and metrics.

> **Self-learning system:**
> Learn from past incidents to improve cause identification and solution. recommendations.

> **Automated responses:**
> Manage low-risk events autonomously to minimise errors and downtime.

> **Intelligent scalability:**
> Ensure uninterrupted service during peak periods.

Resolve rapidly

Accelerate the incident response process with AI automation.

> **Instant ticket creation:**
> Automatically generate incident tickets.

> **Root cause analysis:**
> Swiftly identify the cause of network interruptions.

> **Smarter troubleshooting:**
> Fast-track problem-solving with detailed records.

> **Data retention:**
> Store telemetry data for long-term analysis.

> **Real-time updates:**
> Stay informed from detection to resolution.

The future feels like this.®

We are a multi-disciplinary technology powerhouse, committed to keeping our customers secure and connected. We partner with our customers to boldly embrace the challenges of tomorrow, ignite innovation, and facilitate growth.

Trusted Partner

Our customers don't just trust us to keep them productive and secure today, but to prepare them for what's next, to grow with them over time and to collaboratively shape their future.

Strategic Advisor

With deep expertise in multiple facets of technology, our customers rely on us to provide them with strategic advice and guidance, helping them make smart moves towards a secure future.

Solution Provider

Our versatile suite of skills enables us to tackle complex challenges for our customers, providing them with complete business solutions that draw from our vast pool of expertise and resources.

Stay connected and protected with Orro®.

Discover how we can help your business and your people with Securely Connected Everything™.
