Managed SASE

Securely Connected, Everywhere

Securely Connected Everything™

Introducing Orro SASE

In today's borderless world, Secure Access Service Edge (SASE) delivers on the demand for fast, reliable, and secure connectivity — anywhere, anytime, on any device. Where traditional security models fall short, SASE architectures step up, combining networking and security capabilities into a single, cloud-native offering.

At the forefront of this evolutionary shift is Orro SASE, which redefines secure connectivity with its sophisticated blend of networking and security technologies and the vigilance of our Security Operations Centre (SOC) – delivered as a fully managed, cloud-based offering. However, what truly sets Orro SASE apart is the combination and convergence of our One Touch Control (OTC) and SOC platforms.

With Orro SASE, you can confidently extend secure access to remote users, local branches, and vast campuses, ensuring comprehensive coverage and visibility over all IT assets.

Expect Outstanding Outcomes With Orro SASE

> ### Uniform Security Across All Points of Connection
>
> Every connection is wrapped in the highest level of security, regardless of where it originates or ends.

> ### Controlled Access to Your Data
>
> Ensuring only authorised eyes have access to your sensitive information.

> ### Exceptional User Experiences
>
> Consistent connections that boost productivity and satisfaction.

> ### Regulatory Compliance
>
> Always stay in line with data security standards, protecting your reputation and bottom line.

> ### Simplified Operations
>
> No more managing multiple vendors and technologies, reducing both costs and complexity.

> ### Cost Efficiency
>
> Move from capital expenditures to an operational expense model that's both manageable and scalable.

Is It Time for SASE?
Recognising the Signs

If you're noticing the following signs, it might be time to consider Orro SASE.

Escalating Security Concerns

Your current security infrastructure is struggling to cope with the increasing volume, frequency, and sophistication of cyber threats.

Decentralised Work Environments

Your workforce is no longer confined to office walls; they connect to your network from various, often unsecured, locations.

Limited Visibility

You face challenges in gaining full visibility into cloud resources and end-user activities, crucial for effective threat monitoring.

Unmanaged Devices

Not all devices connecting to your network are within your control, creating vulnerabilities for security breaches.

Increased Reliance on Cloud Solutions

With your applications predominantly hosted in the cloud, traditional security measures no longer suffice.

Demand for Direct Access

Your users demand direct and seamless access to network resources, regardless of their location or device.

Compromised User Experience

Network performance issues and restricted access are deteriorating the end-user experience.

Deliver a consistent, fast and secure connection for your team, no matter where they are or what device they are using.

Key capabilities to keep you protected

Secure SD-WAN
Enjoy optimised network traffic and enhanced performance with robust security measures right at the WAN edge.

Endpoint Protection
Advanced technology continuously protects all devices linked to your network, ensuring your data and workflows remain protected anytime, anywhere.

Zero Trust Network Access (ZTNA)
Implements strict identity verification for every connection, reducing the attack surface by granting access only to verified users and devices.

Cloud Access Security Broker (CASB)
Ensures secure interaction between your users and cloud applications, guarding against cloud-based threats.

Centralised Policy Management
Maintains consistent security policies across distributed networks, allowing swift adjustments to configurations in response to emerging threats.
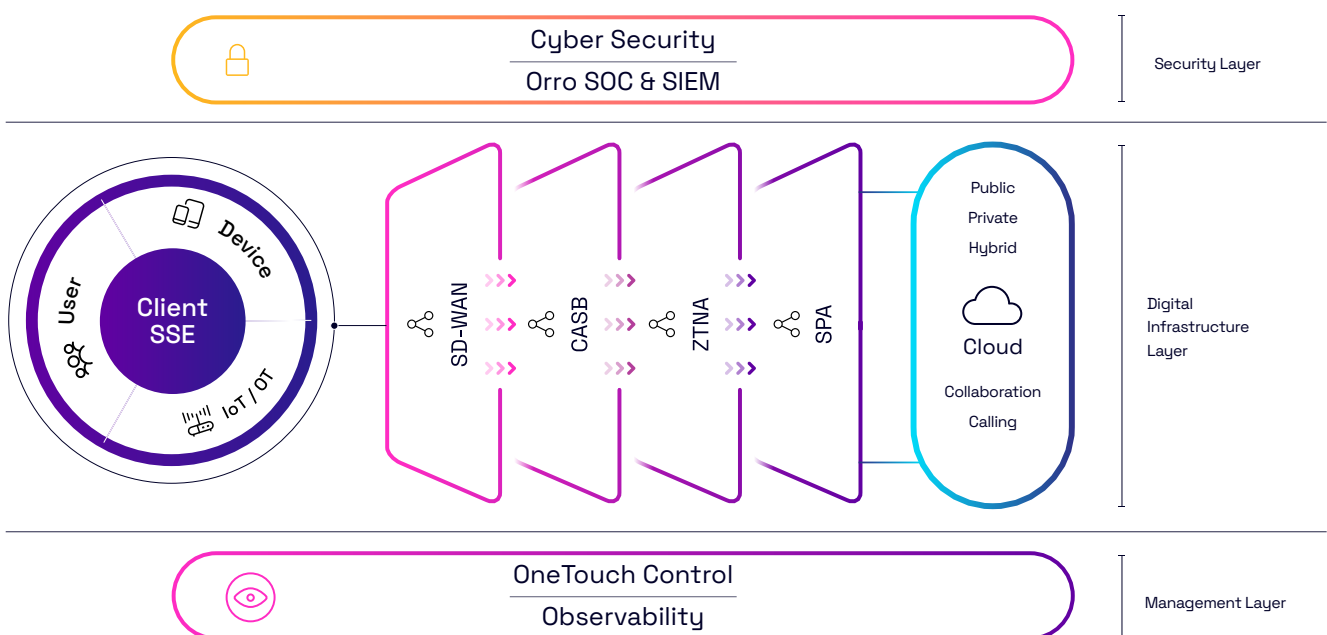

Secure Web Gateway (SWG)
Inspects web traffic in real-time to prevent harmful content from disrupting operations while enforcing security policies.

Network Automation
Empowers your network to self-optimise, responding to traffic flows and potential threats autonomously.

Data Loss Prevention (DLP)
Safeguards critical information, blocking potential data leaks and ensuring compliance with privacy standards.

Behind the Secure Network:
Orro's Security Operations Centre

With Orro's SOC, you benefit from:

> **24x7 Monitoring & Support**
> Our SOC team vigilantly monitors your network, ready to respond instantly to any anomalies.

> **Maintenance & Updates**
> Proactive scanning for vulnerabilities to keep your infrastructure secure.

> **Incident Response**
> Leveraging SIEM systems, advanced analytics, and automated orchestration for fast threat detection and eradication.

> **Assessment & Design**
> Creating a tailored SASE architecture to meet your unique needs and goals.

ORRO OneTouch®
CONTROL

The Epicentre of Excellence in Network Security

What's outstanding about OTC?

The All-Seeing Dashboard

Gain real-time insights through an intuitive dashboard that integrates with leading security tools.

Intelligent Incident Management

Streamline incident resolution, from automatic ticket generation to root cause analysis and beyond

AI-Enhanced Vigilance

Predict and autonomously manage threats and learn from incidents to enhance future responses

The future feels like this.®

We are a multi-disciplinary technology powerhouse, committed to keeping our customers secure and connected. We partner with our customers to boldly embrace the challenges of tomorrow, ignite innovation, and facilitate growth.

Trusted Partner

Our customers don't just trust us to keep them productive and secure today, but to prepare them for what's next, to grow with them over time and to collaboratively shape their future.

Strategic Advisor

With deep expertise in multiple facets of technology, our customers rely on us to provide them with strategic advice and guidance, helping them make smart moves towards a secure future.

Solution Provider

Our versatile suite of skills enables us to tackle complex challenges for our customers, providing them with complete business solutions that draw from our vast pool of expertise and resources.

The Orro SASE Promise:
Stay Securely Connected, Everywhere

Discover how we can help your business and your people with Securely Connected Everything™.
